Survival Difficulty: Class 9

» Lethal Insecurity

» Wholly Unstable

» Entity Surfeit

Description

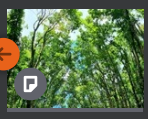

Castle photo.

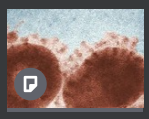

The level is an endless field, in which sometimes there are Ancient Castles, Abandoned medieval cities and sometimes lakes. Forests are also sometimes found, most often around lakes.

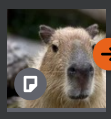

The level is completely overrun by entities such as Clumps, medieval Facelings, Skin-stealers and according to the discoverer NotSmilers. Although the information about NotSmilers has been refuted, there are still a lot of undocumented entities out there. Even without these entities, the quitoes and other insects live in pain in the body and the failure of insect is the **Mosquito** usually linger in a group. First of all, they initially try to get close to the open surface of the body in order to bite

and infect the victim. After the bite, the victim's whole body will begin to hurt, namely in those parts of the body in which the bite was carried out.

Photo of an abandoned medieval city.

Also on the level you can hear Tranquility Bird singing, only the source of the sound has not been found. Most often, singing is well heard near some lakes, which is why it is so calm in them. Many report that they have found the level boundary, but these reports are still under review. Castles are always empty, and abandoned cities consist only of empty abandoned houses and, in rare cases, some dilapidated buildings. Perhaps there are other buildings on the level, since the level has been studied by 20%, so there is no need to rush to conclusions.

Photo of a small lake.

Entities

The level is overrun with Skin-stealers, Smilers, Clumps, Medieval Facelings, Tranquility Birds, and unconfirmed NotSmilers.

Colonies and Outposts

No Outposts were founded on the level.
